Software Engineer with a Bachelor of Science in Software Engineering from BYU-Idaho and specialized frontend training through Frontend Simplified. Experienced in building responsive, user-focused web applications using React, TypeScript, Firebase, and modern development tools. Passionate about creating scalable, high-performance solutions while delivering intuitive user experiences.

Professional Experience

Ultraverse - NFT Marketplace Frontend

[Remote](#) | June 2026

Frontend Engineer

- Built a responsive single-page NFT marketplace that lets users discover digital collectibles, browse creator profiles, and inspect item-level details including pricing, ownership, creator attribution, view, and likes.
- Developed with React 19, React Router, Axios, JavaScript, HTML/CSS, and Bootstrap-based responsive layouts; organized UI into reusable page, marketplace-card, navigation, footer, loading, and countdown components.
- Integrated live Google Cloud Functions REST endpoints to retrieve new listings, top sellers, collections, filtered marketplace results, creator portfolios, and individual NFT metadata.
- Implemented client-side marketplace discovery features: sortable listings by price and popularity, progressive “load more” rendering, responsive item carousels, dynamic routes for creators and NFTs, and reusable links between related marketplace data.
- Improved perceived performance and usability with skeleton-loading states during asynchronous requests, plus real-time auction countdown timers that update every second and clean up intervals correctly.
- Used production-oriented frontend workflows through Create React App, ESLint configuration, browser compatibility targeting, automated test-library dependencies, and optimized production build support.

Summarist

[Remote](#) | July 2026

Frontend Developer & Support staff

- Built a responsive book-summary and audio-learning platform with Next.js 16, React 19, TypeScript, Firebase, Firestore, and Zustand, enabling users to discover, read, and listen to condensed nonfiction content.
- Implemented server-rendered, data-driven recommendation experiences by concurrently fetching selected, recommended, and suggested books from cloud-function APIs; modeled catalog data with TypeScript interfaces and optimized remote media through `next/image`.
- Delivered a real-time search workflow that queries books by author or title with a 300 ms debounce, loading-state skeletons, and direct navigation to detailed book pages.
- Integrated Firebase Authentication and Firestore for email/password registration and login, user-profile creation, persisted guest sessions, logout, and subscription-state-aware UI behavior.
- Created an interactive HTML5 audiobook player with play/pause, ± 10 -second seeking, draggable progress control, elapsed/total-time display, metadata-derived duration tracking, and access gating for subscription-only audio.

Projects (personal)

Search API Project: [Live Demo](#) | [Github Link](#)

Created a fully functional search platform for movies

- Engineered & integrated a search api for (movies/anime/etc) with a fully responsive design, loading states & dynamic routing to showcase end users movies on a mass level search and showcase (movies/anime/etc) on an individual route.

Covenant AI Consulting | Business Website: [Live Demo](#) | [Github Link](#)

I had the privilege to build a website for my brother's business according to his direction and specifications

- Built and deployed Covenant AI Consulting, a responsive marketing/business site (React 19, Vite, React Router) featuring a multi-page site architecture, reusable component library, FontAwesome iconography, and an integrated EmailJS contact form for lead capture — configured with ESLint for code quality.

Technical Skills

Programming Languages: TypeScript, JavaScript, HTML, CSS

Frameworks: React, TailwindCSS, Firebase, NextJS, Zustand

Tools & Other platforms: Netlify, Vercel, GitHub, Vite, VS Code

Education:

Frontend Simplified | [Certificate](#)

[April 2026 - September 2026](#)

Degrees: Bachelor's of Science in Software Engineering from Brigham Young University - Idaho | 3.89 GPA

Other

Interests: I enjoy reading, playing the piano, going to the gym, spending time in nature, and playing video games.
